TITLE : GARBAGE TREATING DEVICE

ABSTRACT : PURPOSE: To obtain a garbage treating device having hammers for efficiently pulverizing crude refuse.

CONSTITUTION: The main body 2 of this garbage treating device having a crude refuse throwing port 1 in the upper part is provided with a pulverizing chamber 3 in the upper part thereof, is provided with stationary blades 4 on its inner side walls and is provided freely rotatably with a rotary blade 6 having the hammers 5 laminated with plural hammer pieces oscillating in proximity these stationary blade. The stationary blades 4 and oscillation shafts 9 for the hammers to support the hammers 5 are disposed in different numbers. The shaft of an electric motor 7 fixes the rotary blade 6 and rotates the rotary blade to pulverize the garbage together with the stationary blades 4. As a result, the garbage is efficiently treated with low noise and low vibration.
